

Statistics Board, minute of the meeting of 12 February 2026

Item 4. Business Activity Survey, follow up schedule for 2026.

The Head of Collection reported that the migration to the new collection platform in November 2025 had not carried across the compilation programs or the parameter sheets used for earlier schedules, and that the 2026 schedule would have to be compiled afresh from the migrated dispatch and receipt records.

The Board noted that under clause 6 of COS 2019 a schedule may only be put to it if the compilation reproduces every mean elapsed time published in the Collection Performance Bulletin for 2021 to 2024, and asked that the note for the March meeting set out that reconciliation in full, together with any reading of the records that was considered and set aside.

The Board asked for one schedule, in the form the collection system loads, with the survey wide boundaries, and for the note to identify the stratum moving furthest against the 2025 schedule.

Action: Head of Collection, for the meeting of 19 March 2026.
