

Recommendation: standardise on Zapier

Lowest 12-month cost (Nov 2025 - Oct 2026): EUR 38,927, vs n8n EUR 42,120 and Make EUR 42,352.

How the numbers were built

- 593,579 business runs in Oct 2024 - Sep 2025 after de-duplicating export batches, removing retries, replays, tests, parallel-run mirrors and incident duplicates, and dropping sandbox items.
- Forward volume repeats the same calendar months; 4 churned clients are excluded (101 workflows in scope).
- Zapier plan: 200,000 tasks/month (annual billing, 20% off); Make plan: 250,000 ops/month (+14% from Jan 2026); n8n plan: 100,000 executions/month (peak month 56,019).
- Migration: 66 workflows to Zapier (382 h), 56 to Make (418 h), 80 to n8n (1,040 h) at EUR 36/h.
- USD converted at EURUSD 1.124.

Zapier is the most expensive subscription but the cheapest platform to move into at this volume. The margin over n8n is about 8%.
