

Calloway Industrial Group: delegation of authority and procure-to-pay controls

Approval limits (per invoice, USD)

Approver level	Limit per invoice
Approver L1	10,000
Approver L2	50,000
Approver L3	250,000

An approver may not approve an invoice above their limit. Splitting a purchase into several invoices to stay under a limit is prohibited.

Purchase orders and receiving

Invoices above USD 5,000 need a purchase order. Invoices of USD 5,000 or less may be paid without a purchase order with approver sign-off. Goods purchase orders (po_type GOODS) must have goods received and recorded in the goods-receipt file before payment. Services purchase orders (po_type SVC) are accepted on approver sign-off and have no goods receipt.

Vendor master and segregation of duties

A vendor is identified by the vendor master. The ERP migration on 1 March 2025 re-keyed some vendors: a vendor with a legacy id and a current id is one vendor. The employee who creates a vendor must not enter that vendor's invoices. New vendors must pass TIN matching (tin_status matched).

Bank account changes

Every bank account change needs a call-back to a known vendor contact and a ticket reference (callback_verified Y). A change without call-back verification must not be followed by a payment of USD 25,000 or more to the new account within 14 days.

Blocked vendors

No payment may be released to a vendor while it is blocked, unless the CFO approves an override and it is logged (block_overrides).

Synthetic exercise document.
