

Contract terms summary - renewals on 1 November 2025

Term and billing

All three subscriptions renew on 1 November 2025 for a 12-month term (Nov 2025 - Oct 2026). Usage allowances reset on the 1st of each calendar month; unused allowance does not roll over.

Make

Make has notified a list-price increase of 14% effective 1 January 2026. It applies to monthly plan fees and to overage rates for every plan, including plans bought at this renewal. Overage is billed monthly in blocks of 1,000 operations, rounded up.

Zapier

Annual billing gives a 20% discount on the plan list price. The discount does not apply to overage. Overage is billed monthly per block of 1,000 tasks, rounded up, at 1.25 x the plan's list price per 1,000 allowance tasks (list price divided by allowance in thousands).

Plan changes: if tasks used in a month exceed 125% of the plan allowance, Zapier moves the account up one plan from the following month for the rest of the term, at that plan's price with the annual discount. Overage in the month that triggered the move is billed on the plan the account was on. The check repeats each month until the top plan.

n8n

The quoted price is the annual-prepay price. There is no overage: executions above the monthly allowance are not run. The plan therefore has to cover the busiest month of the year.

Currency

Make and n8n invoice in EUR. Zapier invoices in USD. Northgate budgets in EUR.
